My Website: [josephlaudati.com](http://josephlaudati.com)

I am a Computer Science student at Clemson University pursuing a career in developing life-changing technology for those in need. Whether it's building simple websites, creating user-friendly apps, or exploring new innovations, my passion for helping others drives everything I develop.

## EDUCATION

**Clemson University**, Clemson, South Carolina

Spring 2026

*Bachelor of Science in Computer Science*

Emphasis: Software Development

## PERSONAL PROJECTS

- **Tiger Scheduling** – A simple solution to your everyday scheduling needs. *[WIP]*
  - Designed and developed a lightweight reminder app to address everyday forgetfulness by offering a faster alternative to traditional calendar tools. Created a streamlined UI that allows users to set reminders with just a few taps—selecting a time, day of the week, and optional memo. Focused on simplicity and usability to provide a quicker, less cluttered experience than Apple's native Reminders app.
- **Personal Website** – A showcase for all my work.
  - Designed and developed a portfolio website for all my work done in and out of the classroom. Compiled all my skills, projects, and information about me into one minimalist webpage that informs you of who I am. Linked other pages that showcase my personal projects, as well as my classroom work, which demonstrate the skills I've learned throughout my college career.

## TECHNICAL SKILLS

|   |                               |
|---|-------------------------------|
| Swift/ Swift UI (Beginner)                | Git (Intermediate / Beginner) |
| HTML/CSS(Intermediate)                    | GitHub(Proficient)            |
| C/C++ (Intermediate)                      | JavaScript (Beginner)         |
| Interpersonal Communication (Proficient)  | Python(Beginner)              |
| Microsoft Visual Studio Code (Proficient) | OOP(Intermediate)             |
| Java(Beginner)                            | Postman(beginner)             |
| AWS (Beginner)                            | OpenAPI(Beginner)             |

## WORK EXPERIENCE

**Clemson University**, Clemson, South Carolina

Fall 2022-Current

*Student Intern – Clemson Ticket Office*

- Provides technical assistance and high-quality service, supporting ticketing operations using Ticketmaster's Archtics software.
- Problem-solve in fast-paced situations, facilitating an optimal experience for event patrons
